SUBJECT INDEX

Book review, 547

DC machines, 113
    permanent magnet, 113
Dual converter, 185

Electric machines, 53
    equivalent circuit, 535
    general theory of, 53

Homopolar alternator modelling, 273
HVDC converters, 319
Hysteresis motors, 147

Induction motors, 13, 25, 41, 77
    air core, 137
    control of, 25
    deep-bar, 387
    inverter-fed, 13
    linear, 125
    minimum input power, 41
    thermal loading of, 77
    time domain analysis of, 13
    variable frequency operation, 41, 105, 523
    wound rotor, 25
    stability analysis, 105
Inverter, impulse commutated, 485

Linear induction motors, 125, 443
    single-sided, 125, 443

Microalternation, excitation control of, 263
Multimachine system, local control of, 89

Nonlinear magnetic materials, 401

Permanent magnet machines, 113, 159
Power systems, 89, 171
    dynamic stabilization, 281
    multimachine, 89
    optimal load flow, 367
    power flow, 337
    security assessment, 295
    sliding modes, application of, 171
    stability, 421, 451
    transient stability, 421
    var flow, 295

Reluctance motors, stability, 411

Stepper motor, PM hybrid, 347
Superconducting synchronous machines, 511
Synchronous machines, 1, 201, 215, 229, 249, 273
    converter fed, 229, 249
    reactances, 201
    salient pole saturated, 201
    saturated reactances, 201
    solid-iron, 535
    sudden short circuit, 1
    superconducting, 511
    torque angle, 215

Transmission line protection, 65

Var compensator, static, 357

Wind generators, 485

Sabrie, J. L., 511
Salama, M. H., 41, 523
Sastry, H. S. Y., 421
